"We, **Buheung Medical**, which started with the trade name 'Moduran Electronics,' were established on Christmas Eve in 1980 with the company motto 'Bringing Health and Happiness to Humanity.'"

"Since its establishment, we have focused on personal medical devices and health equipment, securing expertise in the field. Through rigorous clinical and quality verification, we have developed, manufactured, and produced cutting-edge technology products. Throughout this journey, we have obtained dozens of international patents and approvals, contributing to our ongoing progress."

"In particular, in 1997, during the so-called Asian Financial Crisis, we began to focus on frequency electrotherapy technology, accumulating expertise and knowledge in the field of frequencies. Through this, we have built world-class capabilities in the realm of electrical therapies, including interferential electrotherapy, high-frequency, and medium-frequency treatments."

"Since 2006, Buheung Medical has been expanding its technological horizons beyond just therapeutic electrical frequencies. We have been dedicating efforts towards the development of frequency technologies involving light, sound, color, ultrasound, vibration, and more. Our goal at Buheung Medical is to apply these innovative technologies to our products, with the aim of developing and producing the best frequency devices in the industry."

"Currently, **Buheung Medical** is recognized as one of the leading manufacturers of frequency therapy medical devices in the global medical device market. Within the domestic context, it is regarded as one of the oldest medical device companies. Right from its inception, the company has been dedicated to overseas exports. Today, we proudly export 'Made in Korea' medical devices to over 30 countries, including advanced nations like Germany, Japan,

Medical Device for the Treatment of Urinary Incontinence and Female Conditions, including Menstrual Syndrome

Dr.Lady

닥터레이디 MK-000A

Brochure Download

Key Technologies

- Rehabilitation of Muscles and Nerves Using Electrical Therapy
- Improvement of Inflammation and Circulation Through Heat Therapy
- Neural and Circulatory Rehabilitation and Improvement Using Micro Vibration

Efficacy and Effects

- Urinary Incontinence Treatment
- Pelvic Muscle and Nerve Rehabilitation, Functional Enhancement
- Improvement of Menstrual Syndrome
- Relief and Treatment of Vaginitis (Cold Sensation)
- Enhancement of Female Functionality

Product Features

- Skin Recognition Function
- Introduction of Age-Optimized Treatment Programs
- Rapid Therapeutic Effects Through Combination of Electrical, Heat, and Ultrasound Therapies
- World's Smallest Urinary Incontinence Treatment Device
- UV Sterilization Function

Related Paper

- **Journal Name** : LUTS
- **Clinical Institutions**
 - Seoul St. Mary's Hospital, Uijeongbu St. Mary's Hospital, Kangdong Sacred Heart Hospital
- **Clinical Period** : May 2017 to February 2018
- **Clinical Trial Results**
 - 83.87% Improvement in Urinary Incontinence
 - 100% Improvement in Urinary Incontinence for all patients until end of treatment
 - Improvement in Muscle Fibers and Vaginal Muscle Tone
 - Enhancement in Quality of Life & Relief of Menstrual Syndrome
- **SCI Inclusion** : September 2019

Physical Therapy Device for Pain Control

Free Q

프리큐 MK-204

Key Technologies

- Interferential Current Therapy (I.C.T)
- Medium-Frequency and Low-Frequency Electrical Therapy
- Electroacupuncture Electrical Therapy

Efficacy and Effects

- Muscle, Nerve, Joint, and Related Pain
- Improvement and Treatment of Inflammation

Product Features

- Use of Semi-permanent Pads
- Usable During Outdoor Activities
- Long-term Physical Therapy Possible through Interferential Electrical Therapy and Medium-Frequency Electrical Therapy
- Independent and Overall Operation of Each Frequency Therapy Device Possible
- No Need to Replace Gel Pads

Related Paper

- **Clinical Title** : Clinical Data of FreeQ
- **Clinical Institution** :
 - Department of Physical Therapy
 - Daegu University of Health Sciences
- **Clinical Period** :
 - January 6, 2004, to February 6, 2004
- **Clinical Trial Results**
 - Chronic Knee and Back Pain: 93% Patient Improvement
 - Shoulder Muscle Pain and Spasm Patients: 96% Patient Improvement

Key Technologies

- Interferential Current Therapy (I.C.T)
- Medium-Frequency and EMS (Electrical Muscle Stimulation)
- Asymmetrical Resonance Vibration (T.A.R)
- Medium-Frequency Skin Regeneration Function

Efficacy and Effects

- Reduction of Body Fat through Fat Decomposition and Combustion
- Massage Effect
- Internal Fat Decomposition
- Improvement of Blood Circulation

Product Features

- Use of Semi-permanent Pads
- Fat Decomposition through Asymmetrical Vibration Method
- Enhancement of Collagen Activation Function through Medium-Frequency Skin Care Device
- Simultaneous Usage on Multiple Body Areas

Related Paper

- **Clinical Title** : Clinical Data of FreeM
- **Clinical Institution** : Department of Oriental Medicine, Wonkwang University
- **Clinical Period** : April 6, 2005, to May 5, 2005
- **Clinical Trial Results (When Used for 1 Month, 1 Session/Day)** :
- Average Reduction of 13.11 cm in Abdominal Circumference with Usage on the Abdomen
